

Says

Thinks

Which crop gives more profit with less investment?

Is this seed suitable for this soil?

Where to buy quality seeds?

What to do if it rains too much for a job?

Which is the highest yielding crop in this season?

We should have water suitable for this crop

TEAM 1

**India's Agriculture
Crop Production**

The seeds should be sown at proper intervals

The crop can be planted after enriching the soil using compost

The seeds should be sown according to the soil quality and water availability

I hope this crop will yield without loss

Water should be provided for all crops

How to protect crops from insects?
